

PT Synergy Abadi Sentosa

Company Profile

About us

Established in year 2021, with experience since 2008, PT. Synergy Abadi Sentosa. SAS has fulfilled the needs of customers with modern equipment. SAS has variety of machines with high performance & advanced technologies to obtain the best product who are supplied to Indonesia in the sector of pharmaceuticals, Herbal medicine, food & beverages, cosmetics, chemical industries and another manufacturing company.

SAS has experienced & qualified technical and sales persons, who can ensure and guide you in choosing the right machine that suits to your application and support your machine with quality services to get the best results. SAS is also supported by professional trained service engineers.

Vision

With trust, honesty, integrity & the commitment to excellence, PT. Synergy Abadi Sentosa. is doing the best to achieve highest customer satisfaction with qualified products and service. Our goal is to become a world-class company with long term relationship

Mision

To provide best quality machines accordance to customer requirement with best before and after sales service.

Superiority

Technical background of sales team, best after sales service, reliable & fast trouble shooting of technical team, experiences & well-trained engineers, high-class & advanced technology of machinery, professional & well-coordinated teamwork.

OUR PRODUCTS

Handling Machine

Material handling equipment is mechanical equipment used for the movement, storage, control and protection of products throughout the process of manufacturing, distribution, consumption and disposal.

Processing Machine

Machine with multiple stations that performs sequential operations on a product. It may develop products proprietary processes, or be an efficient combination of more well-known processes.

Superiority

The complete stages of the packaging process. Machines include filling machines, sealing machines, wrapping machines, strapping machines, labelling machines

Handling Machine

Powder Handling Machine

Exact positioning of bins or containers, such as ideal deployment above tablet presses. Due to its slim design, SAS handling systems save space and are also well-known for easy operation.

Processing Machine

Powder Handling Machine

Exact positioning of bins or containers, such as ideal deployment above tablet presses. Due to its slim design, SAS handling systems save space and are also well-known for easy operation.

Fluid Bed Dryer

Tangential is the latest technology in fluid bed granulation which can cut off by 50% -75% process time compared to traditional technology (Top spray and bottom spray), giving the highest operation efficiency.

Granulation Line for Production Scale

Uniquely qualified to provide state of the art integrated powder handling and processing line to supply better product than the best and increase the powder productivity efficiently..

Free Drive Milling

One Driver with Interchangeable Head with 3 Function: Fitz Mill Head (Hammer Mill), Cone Mill Head for Sizing (Wet & Dry), and Sifter Screen on Cone Mill Head (for Sieving Function)

Tablet Coating System for Lab / Pilot Scale

The R&D Coating machine is used for film coating or sugar coating in laboratory or pilot production.

Flexible Packaging Machine

Vertical multiline four side seal packaging machine

Mohno pump fills liquid product continuously with high weight accuracy, double horizontal seal rollers make reliable seal and collating machine count.

Stick Packaging Machine with Auger Filler

The machine is servo motor driven which makes product change easy and fast by enabling pre-set of operation condition such as sachet length, filling weight, filling timing, etc.

Single Lane Stick Packing Machine

This makes it possible to measure and fill various kinds of product on one machine such as powder, granule, liquid, paste, and solid product.

Soft Gelatin Encapsulation Machine

Softgelatine Encapsulation Machine

Soft gelatin encapsulation machine with EU GMP compliance, maximum speed of 6 rpm, gelatin / die roll pressure checking system, casting drum cooling water circulation system, Injection timing control system, and adjusting gel ribbon lubrication oil.

Tumble Dry Machine

This Tumble dryer with EU GMP Compliance, Stainless steel frame, Individual inverter for speed control, Individual heater for blower temperature control, and Optimized for vegetable capsule.

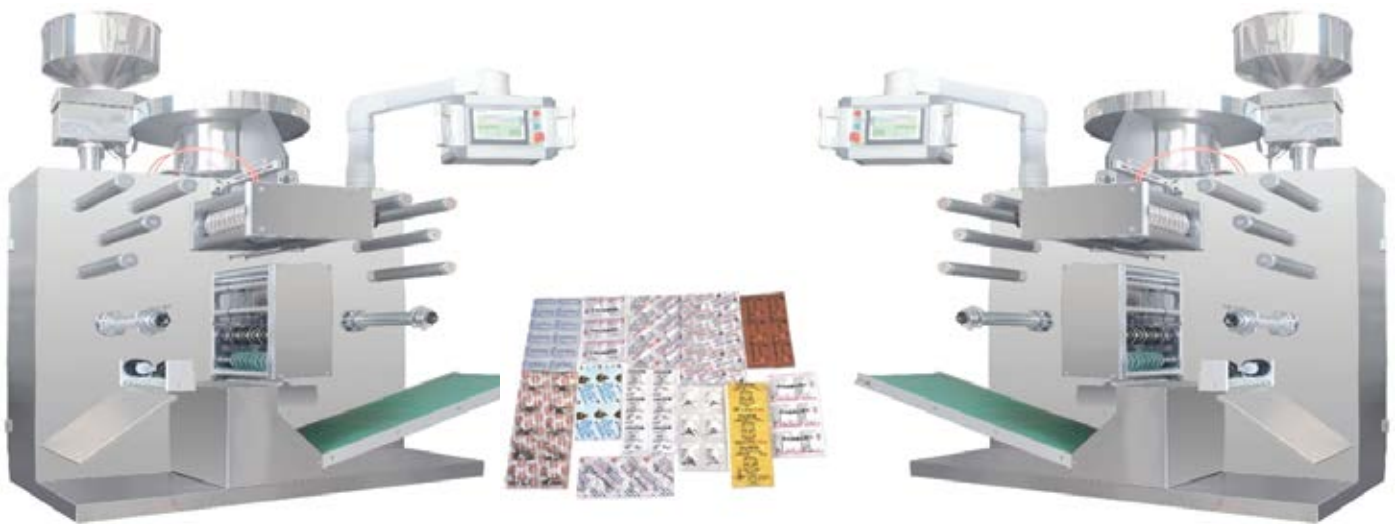

Capsule Filling

Capsule Filling Machine

This filling machine enables filling of multiple types of ingredients, including pellets, liquids and powders in the same capsule.

Tablet & Capsule strip Packaging Machine

Automatic Strip Packaging Machine

This machine is suitable for medicine, chemical, food requirement, it can improve product level and is an ideal automatic packaging equipment.

High Speed Blister Packaging Machine

This machine system serve the packaging a cavity or pocket made from a formable web, usually a thermoformed plastic.

Tube Filling Machine

Tube Filling and Closing Machine

Machines for the filling and closure of politene, laminated or aluminium tubes.

Liquid Filling Machine

Filling for Bottle

The filler machine bottle for glass or plastic.

Pouch Filling Packaging Machine

Automatic Fill and Seal Machines for Pre-made Stand-up Pouches

Filling products (Liquid, Paste, Powder, Solid, Lump,.. etc) into preformed plastic pouch and sealing by heat and then discharging fully automatically. Various shaped pouches are available (with zipper/slide zipper, spout).

Sleeve Shrink Machine

Sleeve Shrink Machine

The whole bottle (including cap), bottle body, and bottle body fixed position sleeve applications.

Labeling Machine

Wrap-Around Labeler

Manufactured for round container, round containers as well as circular ones (wrap around).

Double side & Wrap Around Labeler

Manufactured for front and back sides of square, rectangular or oval containers as well as circular ones (wrap around).

Cartoning Machine

High Speed Automatic Cartoning Machine

Blistering Packaging Machine, combines with Automatic Cartoning Machine to make a complete blister packaging line.

Semi-automatic Gear Pump Filling Machines

Single Head Digital Gear Pump Filling Machine

This machine adopts servo motor drive, PLC and touch screen control, 316L high precision gear pump filling principle, suitable for daily chemical, food, grease and other kinds of fluid and semi fluid material filling.
